Via Zoom---watch for the link

**About our speaker:** Stephen Morse has an interest in genealogy and created the One-Step Website to simplify the process of researching Ellis Island records. In his other life Morse is a computer professional with a doctorate degree in electrical engineering. He has held various research, development, and teaching positions, authored numerous technical papers, written four textbooks, and holds four patents.

**About our program:** The One-Step website started out as an aid for finding passengers in the Ellis Island database. Then it was expanded to help with searching the 1930 census. Over the years it has continued to evolve and today includes about 300 web-based tools in 16 categories. This presentation will describe the range of tools available and give the highlights of each one.

Everyone is welcome---we hope you will join us.
